

Reach Statement rev 1.5

Helmond, 22-11-2022

Information regarding Substances of Very High Concern (SVHC) according to Regulation (EC) No 1907/2006 (REACH), Art. 33

SVHC (substances of very high concern) are chemical bonds (or part of a group of chemical bonds) for which the approval of application within EU is subject to the REACH-regulation.

AQC BV produces and sells printed circuit boards. According to REACH we are a "downstream applicant" of all related substances and materials that are used in PCB production.

The first list of SVHC has been published on October 28th 2008. The latest version dates January 19th 2021, including 211 substances. Based on the information currently available to us from our material suppliers, we can assure that none of the SVHC listed substances according to above Issued Status are contained in the Printed Circuit Boards and other products, in a concentration above 0.1 percent by mass (w/w).

We do stay in close contact with all our suppliers and do properly follow-up a consistent compliance with REACH standards.

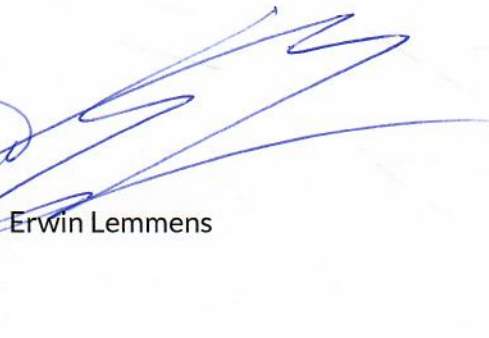

Please do not hesitate to contact us if you have any further questions.
