

Reach Statement

Helmond, 04-02-2026

Information regarding Substances of Very High Concern (SVHC) according to Regulation (EC) No 1907/2006 (REACH), Art. 33

SVHC (substances of very high concern) are chemical bonds (or part of a group of chemical bonds) for which the approval of application within EU is subject to the REACH-regulation.

AQC BV produces and sells printed circuit boards. According to REACH we are a “Downstream User” of all related substances and materials that are used in PCB production.

The first SVHC list was published on October 28, 2008. The most recent version dates from February 4, 2026, and contains 253 substances. Based on information provided by our material suppliers, we can confirm that none of the SVHCs from the aforementioned list are present in our printed circuit boards or other products in concentrations above 0.1% (w/w).

We closely monitor updates from ECHA CHEM and maintain regular contact with our suppliers.

If **AQC BV** is informed about the presence of an SVHC in any supplied product, we will immediately inform the respective customer.

Please do not hesitate to contact us if you have any further questions.
